The JOHNSON PUBLISHING COMPANY, INC. is pleased to present the 1986 edition of the Springfield, Massachusetts City Directory.

It has always been our policy to provide accurate and comprehensive directory service to those communities that desire the "finest". We realize however that some errors and omissions are inevitable and earnestly request that these be brought to our attention by calling (303) 667-0652. These errors and omissions will be corrected in the next edition of the directory. It is only through the interest of the subscribers and users of the directory that each new edition can surpass the last.

In the public interest the use of this directory for any other purpose than as a reference volume or reproduction of any part of this directory is expressly prohibited without written permission from the publisher.

In 1932, a young lawyer fresh from Marquette University decided to publish a book. This was not an ordinary book, but a list of people, their families, occupations and other vital information — a city directory. 1932 was hardly the time to begin, but people and businesses needed this important information then, just as they do now.

Ken Erion started Johnson Publishing Company that year, and guided its growth on

sound business principles and belief in a quality product designed to service his customers. Now, more than fifty years later, Johnson Publishing Company and its affiliates are still doing what Ken Erion initiated in 1932.

From one small city directory in Wisconsin, Johnson Publishing has grown to serve over 2000 communities across the United States with quality, accurate directories.

New products, enhancements of service and our rigorous commitment to place Johnson Publishing Company in a leadership role.

SPRINGFIELD
"a leader in
business
& industry"

Springfield was originally settled in 1636, and incorporated as a town in 1641. William Pynchon was the leader of this group of early settlers who came from Roxbury, Massachusetts. Springfield was named after Pynchon's birthplace in England and in 1852 it became a city. The land was used primarily for agriculture but early in the 18th century the power of the Connecticut River brought about the erection of many mills. Saw and grist mills were the first to appear and large clay deposits in the area were used to manufacture bricks. Financial depression followed the Revolutionary War, placing farmers and mill owners in a difficult financial plight.

Daniel Shays became the hero of these stricken people in attempting to prevent judgments against them for debt. It was at Springfield that Shays met his Waterloo when he tried to capture the United States Arsenal. In 1794, the government established an armory in Springfield, thus creating a rise in the metalgoods industry. In 1835 the advent of the railroad stimulated business and the town had 73 machine shops, six cotton mills, four printing offices, 13 warehouses, one rifle factory, two card factories, two forges, one powder mill, six saw mills, four grist mills, three tanneries, two jewelers' tool factories, one sword factory and one spool factory.

John Brown, a leader of the Abolitionist movement, lived in

Demographics and History continued

Springfield for two years. During this time he harbored hundreds of runaway slaves and passed them along to the next station of the Underground Railway. After the Civil War, labor began to organize and strong unions were created. Since 1890, large industries such as the Van Norman Co., Monsanto, and the Milton Bradley Co. have operated in the city.

- A number of FIRSTS were achieved in the field of education—adult education (1851), general science-music appreciation course (1896-1905), YMCA college training (1880) and agricultural extension course (1913).

Lack of advertising . . . beneficial to some!

When Mark Twain was a young man, he was editor and publisher of a growing newspaper in a small Missouri town. One day he received a letter from one of his subscribers. The subscriber said that he had found a spider in that morning's edition of his paper. He wanted to know if this was an omen of good luck, or of bad luck. Mark Twain, a hustling space salesman as well as an editor, wrote to his customer:

Dear Sir:

Finding the spider in your newspaper yesterday morning was neither good luck or bad luck for you. The spider was merely looking over our paper to see which of the town's merchants is not advertising. He will then go to that store, spin his web across the door, and lead a life of undisturbed peace ever afterward.
